

FAITH-BASED MEETINGS & ELECTIONS

FACT SHEET

FAST, ACCURATE and SECURE technology that will streamline your member meetings and elections.

IML's Faith-Based Meetings & Elections solution will maximize the efficiency and dependability of voting and elections at your next convention.

EFFICIENT

Maximize efficiency and simplify your next conference or House of Delegates meeting process with a single paperless device that allows democratic microphone queuing, instant resolution and election voting. Reduce the time and number of on-site staff it takes to collate, calculate and present the results of a paper ballot or show of hands process.

CLEAR AND ACCURATE REPORTING

A full audit trail of identified voting activity is instantly available, enabling the entire process to undergo detailed scrutiny, affording your organization greater transparency.

INSTANTANEOUS

Real time, instantaneous results will speed up the entire voting process, no matter the size or complexity of your election protocols. This grants more time for members to interact and debate important issues.

EASY TO USE

IML offers a user friendly device that provides attendees with on screen feedback. The system uses state of the art voting keypads to capture members' votes and instantly display the results, giving members the best opportunity to express their views on key issues. A microphone built into the keypad along with our queuing software also provides a platform for members to join a line and to speak in turn.

SCALABLE AND SECURE

Whether you are having a 10 person board meeting or a 10,000 person national election, IML's Member Meeting & Election Solution is your answer for any size meeting or event. Our unique, encrypted technology has been proven 100% secure and accurate.

FAITH-BASED MEETINGS & ELECTIONS

1. REGISTRATION

A Smartcard is issued to each meeting attendee containing a reference number or their name. No confidential information is stored on the card, so if it is lost, it can easily be replaced. This method of registration allows attendance to be tracked easily, affording greater accountability.

2. RESOLUTION VOTING

The Communicator keypad provides immediate on-screen feedback giving voters the security of knowing their vote has been counted. Results can then be displayed instantly on the screen with the option of showing abstentions.

3. ELECTIONS

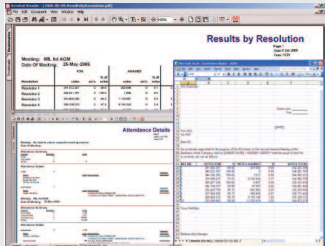

The system is customizable to meet your organization's protocols and can easily accommodate complex election requirements for large or small organizations. Voting privileges can be given to specific individuals dependant on election criteria. Voting can occur simultaneously at remote sites giving you greater geographical reach.

4. MANAGE AUDIENCE

Each member is given a microphone and can easily be put into a line to speak. Our Microphone Queuing solution indicates how many participants want to speak, putting the chairperson firmly in control of the meeting and thus maximizing debate time. In order to be fair and democratic, the queue is accessible to everyone and can be operated on a first-come, first-served basis.

5. REPORTS AND AUDITING

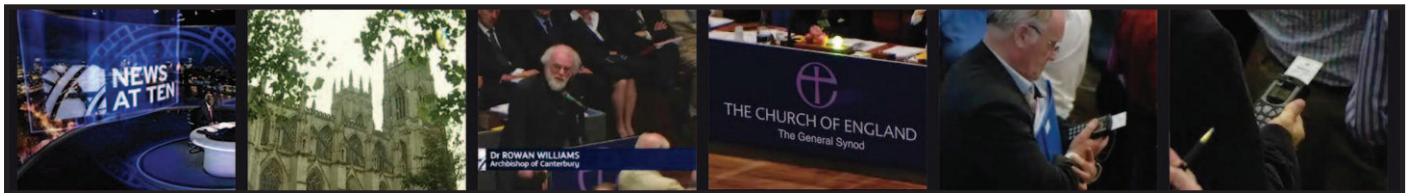

Various reports and an audit trail are produced automatically, giving a full and transparent record of the event.

6. SURVEY AND ANALYSIS

Give your members a chance to communicate views and opinions, without peer pressure, via voting and texting.

IML's keypads were cited as helping to modernize the Church of England through increased use of technology.
